...PRESENTS MISCHER'TRAXLER

Being invited to this year's DMY festival the design ambassadors from Vienna are bringing with them an experimental design position from Austria: The designer duo mischer'traxler, renowned for its exploratory approach, will be installing a giant rolling ball run. But instead of being "powered" by marbles, this one is run on traditional Viennese sweets and will above all playfully feature various projects and designers from past editions of VIENNA DESIGN WEEK. The "Rumkugelbahn" will allow for a fine insight into the Vienna on-goings.
